## CIPM 99 Appendix A - Data Dictionary

---

Document No. CIPM 99 AP-01  
Naval Education & Training Professional Development  
Center (NETPDTC) Unit  
250 Lexington Blvd Suite 259  
Naval Air Station  
Corpus Christi, Texas 78419-5041  
(512) 939-2073 or (AV) 861-2073

## APPENDIX A Data Dictionary

---

Appendix A is an alphabetical list of CIPM 99 data fields. The data for these elements are stored as fields in one or more database tables. Each entry contains the element's field name (FIELD), the data type (TYPE), the database table name (DATABASE) and the data description. These attributes are listed in columnar format and described below:

FIELD      The field name is a 1 to 12 character identifier used when storing and retrieving the data. For Example, to retrieve a member's address, one would reference the field 'ADDRESS'.

TYPE      The type of field coded as:  
N - numeric,  
C - character,  
M - memo,  
D - date.

and the field width in characters. For decimal fraction numeric fields, the field width is followed by a decimal and a digit, which indicates the number of decimal digits of accuracy, is to be stored. For example, N 4.2 means that the field is four characters wide and stores numbers between 0.00 and 9.99.

V A C N R E F U      The database(s) where the field(s) appear. Note that some fields are common to more than one database. For example, SSN appears in three databases. CIPM 99 uses 6 databases. For each database, which has an occurrence of a field, an 'X' is placed in the column under the database code. Otherwise, a '.' is indicated. The database codes are as follows:

A-ASVAB  
C-CIPM  
E-EVENTS  
F-OFFICES  
N-COMMAND  
R-CREO  
U-USERS  
V-ARCHIVE
